

NO LOAD SPEED/NOMINAL TORQUE

Motor GR 53x30-12V= 4490 r.p.m./0,57Nm.
 Motor GR 53x30-24V= 4200 r.p.m./0,67Nm.

WARNING: The load might reduce final speed up to 40%.

Ex

Exceeds maximal
admissible torque

CURVES

GR53x30 12V

GR53x30 24V

GEARBOX TIPS:

Noise: noise level depends on load symmetry, location (avoid acoustic resonance), and rotation speed; the lower the speed on the input shaft (motor), the lower the noise.
