

NO LOAD SPEED/NOMINAL TORQUE

Motor GR 63x25-12V= 3600 r.p.m./0,82Nm.
 Motor GR 63x25-24V= 3600 r.p.m./1,08Nm.

WARNING: The load might reduce final speed up to 40%.

Ex

Exceeds maximal
admissible torque

CURVES

GR63x25 12V

GR63x25 24V

GEARBOX TIPS:

Noise: noise level depends on load symmetry, location (avoid acoustic resonance), and rotation speed; the lower the speed on the input shaft (motor), the lower the noise.
