

NO LOAD SPEED/NOMINAL TORQUE

Motor BG 44x25 SI-24V= 4690 r.p.m./0,196Nm.
Motor BG 44x50 SI-24V= 4830 r.p.m./0,484Nm.

WARNING: The load might reduce final speed up to 40%.

GEARBOX TIPS:

Noise: noise level depends on load symmetry, location (avoid acoustic resonance), and rotation speed; the lower the speed on the input shaft (motor), the lower the noise.
